

December 2025

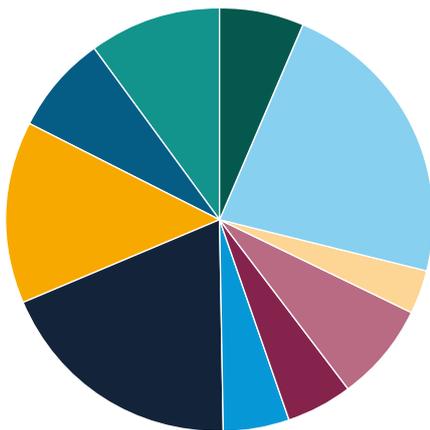

Objectives

Our ISA is an insurance-linked Stocks and Shares individual savings account (ISA). This Medium-Low Risk Fund is based on the Royal London Global Multi-Asset Portfolio ('GMAP') Balanced Fund (the "Fund"). You will not have a direct interest in the Fund, but will hold units in our ISA – any money payable to you will depend on the number of units you hold.

Annual Management Charge (AMC)
0.75%

The Fund's investment objective is to achieve capital growth over the medium-term, which should be considered as a period of three to five years, by predominantly (ie at least 80%) investing in a range of different asset classes including (but not limited to) shares and bonds through investment in Collective Investment Schemes (CIS). This Fund aims to achieve a low to medium level of risk and return. The Fund is actively managed.

Long-term strategic asset allocation for the Fund

UK Equity	6.50%
Global Equity - Excl. Emerging Markets	22.60%
Emerging Markets Equity	3.30%
UK Property	7.50%
Commodities	5.00%
Global High Yield	5.00%

Rlam Global Equity Enhanced Fd r A	5.31%
RL Glob Eq Div Inst ACC R	5.26%
Royal London Index Linked Fund R A	5.00%
Royal London Short Duration Gilts	4.98%

Fund risks

- The value of your investment can go down as well as up and you may get back less than you invested.
- Past performance is not a guarantee of future results.
- Inflation and taking out money will affect what your investment is worth.
- This Stocks and Shares ISA carries a higher risk than a bank or building society cash ISA.
- This Fund is for a medium- to long-term investment. If you close your plan early, it may mean you get back less than you expected.
- The Fund (and the collective investment schemes in which it invests) carry significant risks and the performance of your Stocks and Shares ISA will mirror these. They include:
 - Counterparty risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit risk: Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.
 - Derivative risk: This Fund may undertake transactions in derivatives and forward transactions (both on exchange and over the counter (OTC)). These may include interest rate swaps and interest rate futures for the purposes of meeting the investment objective, protecting the risk to capital, duration and credit management, as well as for hedging. While the discerning use of derivatives can be beneficial, derivatives also involve specific risks. These risks relate specifically to market risk, management risk, credit risk, liquidity risk, the risk of mispricing or improper valuation of derivatives and the risk that derivatives may not correlate perfectly with underlying assets, interest rates and indices. The use of derivative instruments may from time to time alter the economic exposure of the Fund causing it to deviate significantly from the performance of the market as a whole. The use of these derivatives will be within the parameters allowed for linked Funds by the Financial Conduct Authority and Prudential Regulation Authority.
 - EPM techniques risk: The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.
 - Emerging markets risk: Investing in Emerging Markets may provide the potential for greater rewards but carries greater risk due to the possibility of high volatility, low liquidity, currency fluctuations, the adverse effect of social, political and economic instability, weak supervisory structures and accounting standards.
 - Exchange rate risk: Changes in currency exchange rates may affect the value of your investment.
 - Fund investing in Funds risk: The Fund is valued using the latest available price for each underlying investment, however it may not fully reflect changing stock market conditions and the Fund may apply a 'fair value price' to all or part of its portfolio to mitigate this risk. In extreme liquidity conditions, redemptions in the underlying investments, and/or the Fund itself, may be deferred or suspended.
 - Interest rate risk: Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital. Unlike the income from a single fixed interest security, the level of income (yield) from a Fund is not fixed and may go up and down. Bond yields (and as a consequence bond prices) are determined by market perception as to the appropriate level of yields given the economic background.
 - Investment risk: The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.
 - Liquidity and dealing risk: The Fund invests indirectly in assets that may at times be difficult to value, harder to sell, or sell at a fair price. This means that there may be occasions when you experience a delay in being able to deal in the Fund, or receive less than may otherwise be expected when selling your investment.

- Liquidity risk: In difficult market conditions the value of certain Fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.
- Exceptional circumstances, such as significant market disruption, or an emergency situation could affect the performance of the Fund and therefore impact the unit price and valuation process for your Stocks and Shares ISA. We might have to apply our discretion in setting a price of units and/or change from stated Fund investment strategies, or temporarily defer unit transactions or unit pricing. If this happens, we aim to treat existing and future customers fairly.

Important information

Please note that while we offer this ISA, we don't know if it's right for you – we aren't offering financial advice. All we look to do is to give you all the information and help you need. That way, you can make a decision based on your understanding of your own needs.

You may want to contact a financial adviser if you're unsure if our ISA is right for you. You can search the Financial Services Register at register.fca.org.uk/ to check your chosen financial adviser has permission to give advice. If you buy a plan on your own without guidance, you may lose some consumer protection benefits. This means that you may not be able to claim against us.

Shepherds Friendly is a trading name of The Shepherds Friendly Society Limited which is an incorporated Friendly Society under the Friendly Societies Act. Registered No 240F. Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, Financial Services Register No 109997. The Head office and Registered office of The Shepherds Friendly Society is based in the United Kingdom.
